Prof Jeff Kubiak, jjkbuiak@asu.edu

**COURSE OVERVIEW**
This course serves as the culminating experience of the Masters in Global Security (MAGS). The capstone course allows students to explore a contemporary research area or question of interest to them, applying the multitude of analytical tools to which they were exposed during the program. Final written products will be developed individually or in a small group based on consultation with faculty.

**COURSE STRUCTURE AND CREDITS**
The course is organized around student’s interests and engagement with MAGS material, ideas, themes, theories and questions. Readings and other materials will be developed in relation to specific capstone projects and programming. Assignment of specific faculty will be done by the MAGS program staff prior to course start.

The standard capstone will result in the production by the student of a policy memo of 2,500-4,000 words in length. Topics will be worked agreed upon through discussion with the assigned capstone faculty. Weekly assignments will help guide the ideation, research and writing process.

Students may opt to do an individual project that results in some other type of product or publication. This should be negotiated with the MAGS staff prior to the start of the capstone session.

Periodically the MAGS staff may arrange for an outside agency to provide a research question that is best worked through by a group of students. In this case, students will do a group research project that will result in a report of 4,000-6,000 words as well as develop a 30-minute presentation for the sponsoring agency.

As with any online course, but even more so in the case of this capstone, communication with assigned faculty is critical. This is a 3-credit course and students are expected to spend no less than 135 hours of time completing the tasks laid out in the capstone.

**LEARNING OUTCOMES**
At the completion of this course, students will be able to:
- Summarize, explain and illustrate key ideas related to the MAGS program
- Identify, recall and apply core theories from the MAGS program to specific issues, situations and/or cases
- Review and explain fundamental aspects of ideas, theories and their applications as covered in the MAGS program
- Outline, explain, recognize and analyze central themes and concepts from the MAGS program as linked to particular areas of interest and focus

**ASSIGNMENTS**
The capstone class involves a set product, paper and/or project that will be determined individually for each student.
